Anatomy of the World of Teaching English Learners: Alternative Methods of Instruction (Paperback)

By Jane Goretskaya

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Marina Bichinsky (illustrator). Language: English. Brand new Book. When I prepared all-in-one book for publication, I kept two audiences in mind. Teachers and administrators of public schools were my main focus, of course, but I also thought about the California Department of Education, whose members may be interested in the study results regarding methods of instruction incorporated in school curricula. The book is based on research, conducted in elementary, middle, and high schools with the highest percentage of English Learners (EL), also known as Limited English Proficient (LEP) students in northern California. The chapters of the book serve as the course of professional development for administrators and educators in K-12 institutions. The book also serves as a course for graduate students purchasing their degree in education and social studies. The purpose of the book is to provide guidance for school leaders how to improve education for Limited English Proficiency (LEP) students. The qualitative study, described in the book, sought to develop a broader understanding of the influence of art education and distance learning on disadvantaged LEP students' achievements in English, core subjects, and communication. The deeper understanding was derived from...

Reviews

This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer composed this pdf.

This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It has been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modified the way I think.
